

Regulation 7.12 Non-Availability of the Original Permit to Work Form

- (a) If, for any reason, the original of the Permit to Work form is not available when it is required to be cleared, the appropriate head of department / function or, in the case of a contractor, the site representative of that company must then endorse (countersign) the copy of the Permit to Work, the Responsible Person must clear the Permit to Work by signing the clearance section on the copy of the Permit to Work indicating that all workers have been withdrawn from the work and the plant is in a serviceable condition.

If available, all other accompanying permit documents shall be attached to the copy of the Permit to Work.

- (b) This signature on the copy of the Permit to Work authorises the Appointed Person to revoke the Permit to Work in question.

Regulation 7.13 Non-availability of the Responsible Person.

- (a) In the event of the Responsible Person to whom a Permit to Work has been issued not being available to clear the Permit to Work, the appropriate head of department /function or, in the case of a contractor, the site representative of that company shall decide which other Responsible Person shall clear the Permit to Work.
- (b) Such Responsible Person shall first sign the "change of responsibility" portion on the Permit to Work form, the existing Risk Assessment and as applicable, the pre-work checklist and workers register used. If these are not available, a new workers register, pre-work checklist and Risk Assessment shall be completed as necessary. He shall supervise the completion of the work, fill in and sign the clearance on the Permit to Work form, workers register as applicable and return Permit to Work form to the Appointed Person concerned.
- (c) The appropriate head of department / function or, in the case of a contractor, the site representative of that company shall take all reasonable steps to ensure that no unsafe condition arises from such change.
