

Lesson 7 Self Evaluation Questions:

1. What are the pre-requisites before an outage can be a declared outage?

2. Define outage Permit to Work.

3. Describe the term Outage(s).

4. Define Outage Manager / Project Manager.

5. List the general requirements before work at Power Stations will be permitted in terms of these outage regulations.

This image shows a single page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

6. Who is responsible for all isolations, de-isolations or test-running of plant during a declared outage?

7. What is the purpose of the outage Permit to Work system?

8. Who will issue an outage Permit to Work and to whom will it be issued?

9. List the information to be given in the outage permit isolation section.

10. What must be done with the original of an outage Permit to Work and other related documents for the period of its validity?

11. When must changes to an outage Permit to Work be carried out?

12. What are the responsibilities of the designated outage manager concerning the time of changes in an outage Permit to Work?

NB 13. Explain how to process the Outage Permit to Work during a change in isolations.

NB 14. How will test running be done on plant, which is under an outage Permit to Work?

N/B

15. What is the purpose of the cautionary notice?

16. What evidence will be available that the Responsible Person has received the cautionary notice?

17. What is the responsibility of the Responsible Person regarding the cautionary notice?

18. With regard to the declared outages, which other regulation and procedure must be referred to?

N/B

19. If the RP has delegated supervision to one or more Authorised supervisor(s), what extra duties will the RP then have?

NB 20. Explain the duties of the seconded Responsible Person when accepting the Outage Permit to Work.

21. List the responsibilities of the Responsible Person if he has only signed suspension on a cautionary notice register for a change in isolation to the outage Permit to Work.

NB 22. Explain the duties of the Seconded AP regarding indicating safe to work areas.

NB 23. Explain the duties of the seconded RP regarding indicating safe to work areas.

NB 24. List the documents that must be controlled and stored during the period that the outage Permit to Work is in force.

NB 25. What will the Seconded Responsible Person do with the safety lock key that is used to lock the key safe containing the Outage Permit to Work isolations keys?

NB

26. When will the seconded RP and the RP's remove their safety locks from the outage key safe?

27. Explain the duties of RP when changes are needed in the Outage PTW regarding cautionary notice register.

NB

28. List the responsibilities of the RP towards the seconded RP before work can start.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

29. Explain the process to change the seconded RP on an outage permit.

NB 30. Explain the process to be followed if the RP who signed the cautionary notice register, is not available to sign it off.

NB 31. Explain the process to be followed if the RP's safety lock key is lost or not available.

LESSON 8:

Electrical Plant

Learning Outcomes

At the end of this session, the learner will be able to demonstrate understanding of:

- 1 Mechanical plant related to the ORHVS.
- 2 Plant alive permits
- 3 Requirements of portable electrical tools
- 4 Battery rooms

Measure Documents Outage.

1. Outage PTW ✓
2. Baseline RA ✓
3. Cautionary Notice ✓
4. Cautionary Notice Register ✓
5. Mark up pipe diagrams PID ✓
