

	PLANT SAFETY REGULATIONS DECLASSIFICATION CERTIFICATE	DOCUMENT REFERENCE 240-150642762	REV 3
		APPENDIX 3	

CERTIFICATE

I the undersigned, hereby declare that the **plant** area specified below has been **declassified** in terms of the **Plant Safety Regulations**.

.....

.....

.....

Energy sources severed:

Energy source	Method of severance
.....	
.....	
.....	
.....	
.....	
.....	

Systems drained / decontaminated:

System	Drainage / decontamination carried out
.....	
.....	
.....	
.....	
.....	

Confined spaces opened:

Confined space	Doors / covers removed, decontamination
.....	
.....	
.....	
.....	
.....	

Prepared by:

Name:..... Signature:..... Date:..... Time:.....

Approved by:

Name:..... Signature:..... Date:..... Time:.....

GM / PSM

No.....

Lesson 9 Self Evaluation Questions:

1. Does the following work require a Permit to Work?

State Yes or No

a) Internal work on pulverised fuel equipment.	
b) Floating of safety valves.	
c) Tightening of valve glands.	
d) Work on pressure vessels.	
e) Steam generator pressure parts and pressure pipe work.	
f) Tightening of internally sealed access doors or caps.	
g) Work in confined spaces.	
h) Work on or near overhead crane tracks.	
i) Work on hydrogen cooled machines involving the opening of any casing containing hydrogen.	
j) Work on plant containing or operated by compressed air, gas, liquid, or vapour.	
k) Cleaning of conveyor belt structure or chute from the outside.	

NB 2. List the safety precautions that must be in place if you remove trench covers.

- NB 3. List the safety precautions that must be in place when work is to be carried out in an elevated Position.

4. When can a non-return valve be used as a point of isolation?

5. Who is responsible for the drainage and or reduction to atmospheric pressure?

6. Who is responsible for the safe execution or reduction to atmospheric pressure ?

7. List the requirements in terms of the PSR when a statutory steam generator hydraulic test needs to be done.

NB 8. List the safety conditions for internal work to be carried out in the combustion chamber or steam generator passes.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

9. List the safety conditions that must be in place before any internal work on a mill can commence on a steaming steam generator.

NB

10. List all the requirements when changing burner impellers on a steaming steam generator.

11. State the precautions that must be taken regarding the steam generator and turbine, before Changing burner impellers on a steaming steam generator.

12. When will entry into a bunker be allowed?

NB 13. List the requirements that will apply when entering a bunker from the top.

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

- NB 16. State the precautions that must be adhered to before entering a bunker that contains radioactive material.

17. List the precautions to be taken when cleaning a conveyor belt structure.

18. List the precautions to be taken before maintenance, cleaning, scraping, or climbing over/onto conveyor belt, screw conveyor, chain conveyors, bucket elevators or conditioners are allowed.

NB 19. List the requirements that must be met before access into an ash sump is allowed.

20. List the requirements when mechanical work to be carried out inside the precipitators.

NB 21. When is rodding of the precipitators permissible?

NB 22. What type of tools may be used in the Hydrogen plant?

23. List the requirements for work to be done on Hydrogen equipment when the opening of a casing is involved.

24. List the requirements for work on Hydrogen production plant.

NB 25. What type of work or actions are prohibited in a Hydrogen plant?

NB 26. What are the requirements when handling chemicals?

NB 27. What are the requirements where chemicals spillages may occur?

NB 28. List the requirements for entry into any container which containing dangerous chemical Substances.

NB

29. In what manner must chlorinating plants be maintained?

NB

30. List the requirements before work can start on internal combustion engines.

31. State the requirements that should be met before work commenced on any plant or pipework containing compressed air, gas, liquid, vapour fuel oil or fuel oil vapour.

32. List the requirements for work on or near the wheel track of an overhead crane.

33. When assembling or dismantling a crane, list the requirements for the moving parts of a hoist or lifting machine?

34. List the requirements when work must be done on Electrically driven lifting machines. (Fixed overhead cranes)

35. List the requirements for a person to enter or work in any tunnel, pipeline, aqueduct, or pump.

36. List the requirement before any door is closed that provides access to a confined space.

NB

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

NB 38. What are the requirements towards the door or manhole cover before entry is allowed into a confined space?

NB 39. What are the requirements for a confined space Warning sign?

NB 40. Define hot work.

41. Define hot work approval.

42. Define hot work monitor.

NB 43. List the requirements to be followed when work involving hot work needs to be carried out.

44. What is the value of the MSDS for the RP when conducting his Risk Assessment?

45. Who is responsible for the appointment of the radiation protection officer/controller?

NB

46. Define Radiation-hazard Warning sign.

47. Who may handle, isolate, de-isolate or work on any Radioactive sources or listed electronic products?

48. List the requirement when work or isolations are to be done on fire systems.

NB
4

49. List the requirements to be met before plant can be considered decommissioned.

NB
11

50. List the requirements to be met before plant can be considered declassified.

51. What are the differences between decommissioned and declassified plant regarding the Permit to Work system?

NB
11

52. What are the requirements in terms of the regulations regarding asbestos and other hazardous substances on declassified plant?

ABBREVIATIONS

Acronym	Description
AC	Alternating Current
AIA	Approved Inspection Authority
AO	Appointed Operator
AP	Appointed Person
AS	Authorised Supervisor
EPE	Electrical Protective Equipment
EST	Estimated
EWT	Estimated Work Time
GGP	Generation Group Procedure
GGD	Generation Group Directive
GGs	Generation Group Standard
KPa	Kilo - Pascal's
LAR	Limited Access Register
LPG	Liquid Petroleum Gas
NFPA	National Fire Prevention Association
OHS Act	Occupational Health and Safety (Act)
OH	Occupational Hygiene
ORHVS	Operating Regulation for High Voltage Systems
PPE	Personal Protective Equipment
PTW	Permit to Work
RP	Responsible Person
SANS	South Africa National Standards
WBGT	Wet Bulb Globe Temperature
